

DISCOVER OUR VIRTUAL SMART PACKAGING CENTRE EXPERIENCE

We understand that some packaging challenges can't be solved with an off-the-shelf solution. This is why we created our Smart Packaging Centre where our Packaging Technologists design solutions that perfectly fit each customer's needs. Whether you are looking for a tailor-made pack, new packaging systems, or a combination of the two, you can put your trust in us to create the right solution for your business.

Better still, you can now get your new packaging design from the comfort of your home or office – the same great Smart Packaging Solutions delivered virtually.

Our Packaging Technologists have already created thousands of bespoke packaging solutions and are happy to advise you on the most appropriate pack designs and materials to protect your products and improve your process.

SOME EXAMPLES OF OUR WORK

MANUFACTURER OF EARTH-MOVING EQUIPMENT

Re-engineering a pack design for distributing nuts and bolts to sites globally, eliminated the use of plastic, cut corrosion and reduced pallets in distribution by 13,000 a year.

GAS METER DISTRIBUTOR

An all-corrugated suspension pack design, created to hold the meter in place to prevent damage during transit and give good presentation on arrival.

BREWHIVE

An online seller of premium craft beers received a new pack design that cut costs by 50%, reduced damages and improved the customer experience.

THEVEGANKIND

A new pack design for a limited-edition beauty box promoting TheVeganKind collaboration with influencer Monami Frost. The solution was cost-effective, protected the precious cargo and created the WOW factor for customers.
